Fancy Leaved Caladiums

Caladiums are easily grown but should not be put in a Carnation temperature. Start the bulbs in flats, turning them upside down, since this is a crown-rooting bulb and the roots come out around the top (center) eye. This direct contact with the growing medium produces roots more quickly than the opposite method. Use a mixture of one part leaf-mold, one part good garden loam, and one part peat moss or other coarse neutral material, adding a small amount of coarse charcoal or other rubble for drainage. Press the bulb halfway into the soil and place the flats under a bench. The flats can also be placed on top of the flows, but if this is done they should be shaded. The temperature should be 80 to 85 degrees or higher, as the higher the temperature, the better starting results you will have. Be careful that the flats do not dry out if placed either on the flows or returns. Water sparingly until the bulbs begin to sprout and have roots 4 to 6 inches long. When the sprouts begin to show place the bulbs in 5 or 6 inch pots using good rich leaf-mold. Water copiously when in full growth and use weak liquid manure once weekly if possible.

Miniature Roses are shipped from September until May, from 3 inch pots with soil on their roots, and each plant is wrapped with Sphagnum moss in wax paper. On dormant plants shipped after Dec. 1st tops are cut back to about 1 inch to assure vigorous, symmetrical growth from the Base.

For over the counter sales pot them in 3 or 4 inch pots and bring into growth in a greenhouse or out of doors.

LINDIG SOIL SHREDDERS

The Model B with the ACTIONIZED shredd-blades is the product of several years actual testing in the field and is the finest shredder to be found on the market today.

The Model B is designed for the speedy, thorough, perfect shredding of soil, peat, manure, compost piles, leaf mold, sphagnum moss, shingle tow and sods; also for mixing soil with manure, commercial fertilizer, etc. The Model B will shred five to six times as much soil as could be screened by hand in a given time. All the valuable manure and other humus are retained, assuring you better soil conditions at all times. Stronger plant growth and greater profits are yours with powered shredding.

"GRO-HOSE" THE AUTOMATIC BENCH WATERER

Scientifically designed polythelene hose 2 1/4" wide has **FOUR** holes spaced every eight inches apart, waters the full length and width of your benches — **AUTOMATICALLY**.

Ideal for chemical fertilization, installed in a few minutes and requires no attendance. Saves many man hours of labor. Operates on 1 lb. pressure. Keeps foliage dry.

Each length of "GRO-HOSE" gently and thoroughly waters a two foot area. Two lengths (as shown) are needed for the average bench.

Headers made of copper tubing and brass couplings are used to connect Gro-Hose to your present water supply.

Benches up to 100' in length can be watered from one end of the bench with a two way header. For benches over 100' a four way header exactly in the middle of the bench with four lengths of "Gro-Hose" is used.

"Gro-Hose" is available in stock lengths of 50; 60; 70; 80; 90; and 100 ft. Special lengths on request.

"GRO-HOSE" is also available in black if requested.

FOR GROWING ON STOCK OR SHIPPING . . .

"There is nothing like a 'Huminal' Pot."

Plants grow faster and heavier in "HUMINAL" POTS than plants grown in other types of containers.

Their lightness, sturdiness and **LOW COST** make them a must for progressive growers.

"Huminal" Pots are molded pots made of 75% Peat with 25% Wood Pulp added. They are nutrient treated and contain 1.3% Nitrogen, 1% Phosphoric Acid, 1.6% Potash. They are weed and disease free. The roots of the plants penetrate the walls of the pot in from 3 to 8 weeks depending upon the type of plant and moisture content of the soil.

Use "Huminal" Pots For

BEDDING PLANTS for spring sales will find a ready sale when planted in "Huminal" Pots. Plant and pot are plunged directly into the soil, avoiding transplanting shock.

GROWING ON STOCK—Use "Huminal" Pots to get rapid growth from Geraniums, Begonias, Petunias, Poinsettias, etc., for transplanting into large-size pots and Mothers' day combination pans.

MUMS, CARNATIONS, SNAPS, Etc.—Establish young plants in "Huminal" Pots prior to benching to save time when an unfinished crop prevents direct planting.

SHIPPING—"Huminal" Pots provide a low cost, lightweight and sturdy pot for shipping young plants.

Save Time—Use "Huminal" Pots

FASTER GROWTH—Plants grown in "Huminal" Pots make more vigorous and rapid growth than plants grown in other types of containers.

LESS WATERING—"Huminal" Pots dry out slower than clay pots, therefore requiring less frequent watering.

TRANSPLANTING—Roots penetrate the wall of the "Huminal" Pot. There is no knocking out. When transplanting seedlings and cuttings grown in "Huminal" Pots into combination pans, just dibble a hole and "Pan the Pot."
